

GET THE MOST FORM AND FUNCTION

for your meeting rooms, offices, and collaboration rooms. OfficeSlide™ is a highly customizable solution that expands on the performance and functionality of the ExamSlide™ door to incorporate sidelites, transoms or custom interior storefront elevations. >>>

AD Systems' OfficeSlide™ has been designed for commercial office and institutional applications. We developed OfficeSlide™ with the needs of contemporary offices and meeting spaces in mind and offer a wide range of design and functional features to meet project needs. With our tested acoustical performance, available UL 1784 smoke rating and access control and other hardware options, OfficeSlide™ makes a high performance, high-impact interior sliding door and storefront solution.

OFFICESLIDE™

STANDARD FEATURES

Fully customizable sizes and configurations – transoms, sidelites and storefronts

Single or bi-parting sliding doors, swing door options available

Flush wood, laminate, aluminum or wood stile and rail door leaves

Compatible with most standard wood and aluminum doors

Optional automatic door bottoms for enhanced acoustic performance

Smoke-rated assemblies per UL 1784 available

Acoustic jamb gasketing - enhances privacy and reduces noise transfer

Soft closers tested to over 150,000 cycles - designed with anti-slam soft closing devices

Resilient aluminum perimeter frame protects wall opening and withstands impact

Concealed sill guide, no exposed floor track and no visible facets on the end caps for a cleaner, modern aesthetic

Large opening sizes available, up to 7' clear openings for single openings or 14' for pairs

HARDWARE OPTIONS

ADA-compliant locking and latching hardware

Electronic Access Control available with mag lock or electric strike

Self-closers and automatic operators

DECORATIVE OPTIONS

Glass – any glazing up to 1" thick

Integral blinds or switchable privacy glass

Markerboards or other solid infill panels

High-quality, customizable finishes for doors, glazing and frame

SLIDING DOORS OPEN NEW POSSIBILITIES AT PEOPLES BANK

Location: Munster, Indiana

Architect: Shive-Hattery, Inc.

Products: OfficeSlide™ sliding door system and swing doors

The renovation to Peoples Bank's Corporate Center began as a way to strengthen the organization's sense of collaboration and community by revamping the office's look and its amenities. AD Systems' OfficeSlide™ sliding doors and swing doors helped the architects design a space that did just that. By maximizing space, providing visual connection and acoustic privacy, these doors contributed to the modern and collaborative working environment.

OfficeSlide™ sliding door systems preserved visual connectivity while protecting confidential customer information. Further, by working with AD Systems, the architects were able to find three accompanying swing doors that kept the floor's look consistent and met conference room code requirements. In both the design and construction, the sliding and swing doors were efficient to specify, met multiple aesthetic considerations and provided critical safety and security.

For both door systems, AD Systems provided a pre-construction consultation to help contractors install the doors correctly within the building to maximize their performance. The two door systems and support from AD Systems helped ensure Peoples Bank's updated space would meet and exceed the organization's expectations for a collaborative and community-oriented office.
