Health Care Design Starts Here.

High-performing health care environments begin with materials that provide safety, comfort, and care. **Fire-rated glass and framing, high-performance sliding door systems, and insulating glass units with integrated cord-free louver technology** support patient safety, privacy, and infection control across health care settings.

Our innovative solutions meet rigorous code requirements while enhancing natural light, staff visibility, and energy efficiency. Shape spaces that feel modern, secure, and centered on patient care.

Fire-Rated and Specialty Glass for Health Care

For 50 years, Technical Glass Products (TGP) has provided fire-rated glass and framing for health care environments that deliver both protection and human-centered design. From stairwells to patient rooms, these specialty glazing assemblies meet strict codes while keeping spaces visually connected. TGP also provides X-ray shielding and gamma ray shielding glass for medical imaging rooms. Create environments that are safer, easier to navigate, and better support patients.

Products

- **FireLite®**
Exclusive North American supplier of UL-classified and labeled FireLite® ceramic glazing. Clear and wireless products that block fire, smoke and gases and can meet impact-resistance requirements.
- **Pilkington Pyrostop®**
UL-classified, impact safety-rated transparent wall panels that block fire, smoke, gases and heat transfer; available with options for forced-entry and ballistic resistance.
- **Fireframes®**
A narrow-profile steel framing system that is fire-rated according to UL and ASTM test standards. Available with steel, aluminum and wood-veneer cover caps, these fire-rated frames can be used in storefronts, curtain walls, and glazed floor applications.
- **TGProtect® FR System**
Full-lite, fire-rated door system certified to forced-entry standards.
- **LX-57B and LX Premium**
X-ray shielding lead glass offers excellent radiation protection and superb visual clarity.
- **Pro-GR**
Gamma ray shielding lead glass protects against high radiation gamma.

Sliding Doors for Health Care

Feel better specifying AD Systems for health care environments. Since 2009, our door systems have delivered strong acoustic performance for patient privacy, with options for supporting fire, smoke, x-ray shielding and hygiene requirements. Designed to save space without sacrificing function, our sliding and swinging solutions create quieter, cleaner, more efficient clinical spaces that are easy to navigate and built for modern care.

Products

- **ExamSlide™ Sliding Door System**
Surface-mounted sliding doors.
- **OfficeSlide™ Sliding Door System**
Surface-mounted sliding doors with integral sidelites, transoms, etc.
- **InsetSlide™ Sliding Door System**
Inset-mounted sliding doors with integral sidelite.
- **AutoMotion™ Sliding Door System**
Automatic surface-mounted sliding doors.
- **DualSwing™ Swinging Door System**
Unequal pair of swinging doors.
- **FireSlide™ Sliding Door System**
Surface-mounted, fire-rated sliding doors.
- **XtendSlide™ Sliding Door System**
Surface-mounted or inset-mounted telescoping sliding doors.
- **Custom Solutions**
We work collaboratively with you to meet job-specific requirements and designs.

Architectural Solutions for Health Care

Since 1964, Unicel Architectural has advanced high-performance glazing systems that bring privacy, comfort, and safety to health care spaces. From Vision Control® insulating glass units with integrated louvers to skylights and curtain walls, our systems balance daylight and discretion, giving patients control while supporting visibility for care teams. The result is quieter, more efficient environments designed around dignity and care.

Products

- **Vision Control®**

Door and window design solution featuring insulating glass units with operable, cordless louvers to enhance privacy, sound attenuation, hygiene and security in health care facilities. Vision Control has passed the AAMA 501.8 Standard Test Method for Determination of Resistance to Human Impact of Window Systems Intended for Use in Psychiatric Applications on both interior and exterior applications.

- **Timber Curtain Wall**

Beyond timeless elegance and unmatched visibility, timber curtain walls provide superior construction features in terms of occupant comfort, durability and environmental sustainability. Enjoy greater thermal insulation, wind resistance, and air tightness, along with larger spans and cleaner sightlines.

- **ViuLite®**

ViuLite® is a system of ScreenLine® integrated blinds that are permanently sealed within a double-glazed cavity. This solution ensures total protection against dirt, germs, weather conditions and damage in application for complete maintenance-free convenience.

About Allegion

At Allegion (NYSE: ALLE), we design and manufacture innovative security and access solutions that help keep people safe where they live, learn, work and connect.

We're pioneering safety with our strong legacy of brands like CISA®, Interflex®, LCN®, Schlage®, SimonsVoss®, Von Duprin®, Technical Glass Products, AD Systems and Unicel Architectural. Our comprehensive portfolio of hardware, software and electronic solutions is sold around the world and spans residential and commercial locks, door closer and exit devices, steel doors and frames, access control and workforce productivity systems.
