

## HEALTH CARE WITH EXTRA CARE.

Ideal for clinics, patient rooms, medical office buildings, free standing emergency rooms, patient restrooms and other health care applications. ExamSlide™ was specifically designed to meet the rigorous demands of today's lean health care medical facilities. This system was constructed with the highest quality, commercial grade hardware and precision engineered framing system providing years of trouble-free service. >>>

ADA-compliant operation, along with ‘soft-close’ technology, ensures that patients of all ages and abilities can easily open and close the door. AD Systems offers standard perimeter gasketing and the potential for acoustic mitigation on all four sides with optional patented automatic door bottom, providing the best possible noise reduction to maintain speech privacy standards.

EXAMSLIDE™

STANDARD FEATURES

- Space-saving design saves up to 30 sq ft, when compared to a swing door
- Heavy-duty, top-hung roller system for smooth operation without floor tracks (low maintenance)
- Concealed floor guide - no exposed floor track
- No visible fasteners on the end caps for a clean aesthetic
- Three side perimeter gasket standard
- ADA-compliant operation
- Soft-close dampening system prevents slamming – tested to over 150,000 cycles
- Easy to clean aluminum frame system wraps and protects wall construction
- Fully customizable sizes and configurations, transoms, sidelites and storefronts
- Meets the rigorous demands of today's LEAN-model health care facilities

HARDWARE OPTIONS

- Key locks
- Privacy locks (with or without indicator)
- Magnetic lock or electric strike for integration with key card/access control
- ADA-compliant locking and latching hardware
- Self-closers and automatic operators
- Optional patented automatic door bottom that creates an acoustic barrier to achieve speech privacy (NIC 39)

DECORATIVE OPTIONS

- Flush wood door or laminate door; wood stile and rail door with glass; aluminum stile and rail with glass
- Glass – any glazing up to 1” thick
- Range of glazing and infill panel choices, including decorative glass, marker boards, integrated cordless louvers, switchable privacy glass, or solid infill panels
- High-quality, customizable door, glazing & frame finishes
- Lead shielding doors and glazing for X-ray rooms

## ALTRU HEALTH SYSTEM: A HOSPITAL VISION FOR HEALING THROUGH DESIGN

Location: Grand Forks, ND

Architect: JLG Architects

Products: ExamSlide™

Altru Health System has evolved into one of the largest health networks serving northeast North Dakota and northwest Minnesota, culminating in the opening of a new 550,000-square-foot hospital in Grand Forks. Designed by JLG Architects in collaboration with Altru's Facility Planning Committee, the hospital is conceived as a "Care Center in the Park," blending restorative, patient-centered environments with efficient, staff-supportive workflows. The result is a forward-looking facility equipped to meet today's care demands while remaining adaptable for the future.

Inside, the hospital's human-centered design emphasizes comfort, connection, privacy, and performance. Architectural elements such as advanced sliding door systems and specialized glazing promote visual transparency, acoustic control, natural daylight, and space efficiency, supporting both patient well-being and caregiver focus. Integrated privacy and sound solutions help reduce noise, protect dignity, and enhance clinical communication, while accessible, space-saving door designs improve workflow and compliance with ADA standards. Together with fire-rated and radiation-shielding glazing in critical areas, these systems reflect a holistic approach to safety, efficiency, and healing. Every detail reinforces Altru's long-term vision of delivering world-class care in an environment designed to support patients, staff, and the community for decades to come.
