

THE INSIDE TRACK ON INNOVATION.

InsetSlide™ combines the best features of a traditional sliding door with an integral sidelite, allowing it to fit seamlessly between walls. Its space-saving, top-hung design ensures smooth operation without a floor track, while the aluminum frame protects wall construction. This system offers a clean look with no corridor projection. >>>

Here’s the inside story. InsetSlide™ is an innovative response to our customers’ desire for a sliding door that’s inset into the wall opening. Enjoy the same exceptional design, performance, and hardware options as our surface-mounted systems, but now with an integral sidelite that allows the system to fit between the walls with no projection into the corridor. Specify wood or aluminum stile and rail doors with glass sidelite or solid infill options.

STANDARD FEATURES

- Sliding door solution that is inset into the wall opening with an integral sidelite
- Acoustical perimeter seals standard; optional drop seal for enhanced acoustic performance
- Space-saving design with a top hung roller for smooth, maintenance-free operation with no floor track
- Choice of materials, finishes and hardware with a high-quality perimeter frame
- Soft close dampening system – tested to over 150,000 cycles
- High quality extrusions are designed for real world construction environments and can accommodate tolerances
- Easy to clean, resilient aluminum frame system wraps and protects wall construction
- Smooth silicone gasketing for easier cleaning
- Integral sidelite that can feature almost any glazing or infill panel up to 1” thick
- Durable concealed door guide
- No visible fasteners on the end caps for a cleaner aesthetic

HARDWARE OPTIONS

- ADA thumb-turn lock with occupancy indicator
- Key locks
- ADA self-latching mortise
- Magnetic lock – key card/access control
- Single-action egress with lever
- Flush pulls and anti-ligature hardware
- Optional: Automatic operators

DECORATIVE OPTIONS

- Flush wood door or laminate door; wood stile and rail door with glass; aluminum stile and rail with glass
- Glass – any glazing up to 1” thick
- Range of glazing and infill panel choices, including decorative glass, marker boards, integrated cordless louvers or solid infill panels
- High quality Kynar PVDF paint for uniform finish, in standard silver or any custom color
- Lead shielding doors and glazing for X-ray rooms

INSET SLIDING DOORS DESIGNED FOR MULTICARE INDIGO

Location: Tacoma, Washington

Architect: BCRA Design

Products: InsetSlide™

When BCRA Design began work on the MultiCare Indigo Urgent Care Clinics, they approached AD Systems with a request for a custom product. The project team wanted to include a space-saving sliding door system in the exam rooms that remained flush with the wall. And so, InsetSlide™ was designed specifically with MultiCare Indigo in mind.

InsetSlide features a door that slides over an integral sidelite, which allows the system to fit between the walls with no projection into the corridor (as opposed to a traditional surface-mounted sliding door). The inset design achieved the key project goal of having the door rest flush with the wall for a clean aesthetic and preservation of hallway clearances down the corridors. The sliding door system also includes acoustical perimeter seals to reduce noise transfer between exam rooms, providing privacy for patients and doctors.

Due to the positive customer feedback from this MultiCare Indigo project, AD Systems now offers InsetSlide as a standard product.
